

LiteFarm is a **free and open source** farm management tool made for sustainable farmers

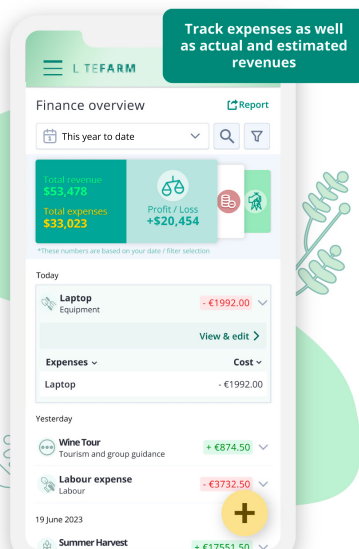

LiteFarm is free to use and you own your data, now and forever. LiteFarm has been co-designed by farmers, with ease of use as our top priority. Our features are designed especially for the needs of sustainable, diversified, and organic farmers.

Simplify your operations

- Get everyone on the same page with real-time tasks
- Find information you need quickly with a simple, searchable, map-based interface
- Enter data once to seamlessly tie your operations, certifications, and payroll together

Help you earn more money

- Understand profitability on a crop-by-crop basis
- Compare product prices by time and location throughout the season
- Keep track of your payroll
- Generate and export a report of your finances

Streamline your certification

- Make organic certification a breeze with simple and powerful document exports
- Upload or snap a photo of all your receipts and compliance documents
- Make audits and verifications easy by inviting verification officers to your farm instance

Grow with us!
